-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

1. Claims 1-19 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. In Claim 1, lines 6-9, tubes "being substantially unobstructed along a length thereof" ; and inserting said predetermined configuration into an opening of a header of such heat exchanger, such header" were not described in the specification.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1- 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Hagenmeister(U.S. Patent 4,815,535).

Hagenmeister discloses a method of at least one of increasing airflow around a plurality of tubes in a heat exchanger, and increasing a web in a header around such plurality of tubes, the method comprising the steps of:

a) providing a predetermined plurality tubes (8) having

Art Unit: 3726

a predetermined end configuration and being substantially unobstructed along a length thereof;  
b) inserting the predetermined configuration into an opening of a header of such heat exchanger, such header having a predetermined number of openings disposed in a predetermined staggered array; and c) securing an end of each predetermined plurality of tubes into the predetermined number of openings in the header ; and wherein configuring of the predetermined number of openings is created substantially identical to the predetermined end configurations the predetermined plurality of tubes (Figs 1,2 and 3; col. 2, lines 23-28; col. 4, lines 58-68)

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 16-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hagenmeier (U.S. Patent 4,815,535).

Hagenmeier fails to teach the steps of creating fluid seal and fluid seal is accomplished by at least one mechanical (rolling and machining) and non-mechanical bond (at least one of welding, brazing and adhesive).

Official Note is taken that creating fluid seal and fluid seal is accomplished by at least one mechanical (rolling and machining) and non-mechanical bond (at least one of welding, brazing and adhesive) is well known in the art and it would have been obvious to one of ordinary skill in the art at the time of the invention was made to employ the above steps on the Hagenmeiers process for achieving fluid seals .

***Response to Arguments***

6. Applicant's arguments filed 3/2/05 have been fully considered but they are not persuasive. See the new Office Action.

***Conclusion***

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to John C. Hong whose telephone number is 571-272-4529. The examiner can normally be reached on M-F(07:00-16:30)First Friday Off.
